Infrastructure

In order to carry out our day to day activities in a streamlined manner, we have erected a world class infrastructure for ourselves. Our fully Air Conditioning infrastructure sprawls across a vast area for administration, manufacturing, packaging & ware housing. We have also outfitted our infrastructure with the latest machinery and advanced testing equipment & well quipped with all the requisite modern amenities.

R & D and Photo Metric Lab

Through new technologies integration, **GRE** is preparing the simplest, the greenest, the most efficient and available solution in lighting field.
Photo Metric sphere helps to measure the flux emitted & to detect the distribution of light emission from the device (lamp).

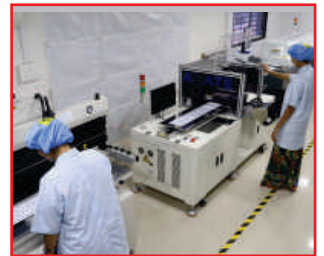

Production Unit

Modern manufacturing facilities includes all intermediate processes required for the production and integration of a product's components. At **GRE**, the production of large amount of standardized products, including and especially on assembly lines.

SMT Line

To meet the latest market demands, **GRE** are backed by well equipped SMT line based on advance and sophisticated technology which is capable of achieving our target production with full accuracy and quality.

Quality Control

It tests a wide range of electrical parameters and automatically checks them against specifications . It works fast-just a few seconds per test which can be used on high speed production lines for **GRE**.
